Qualities

- Creativity
- Proactivity
- Adaptability
- Emotional Intelligence
- Collaboration
- Communication
- Critical Thinking
- Continuous Learning

About me

Technical Expertise: My primary focus is on building scalable, maintainable, and high-performance applications using JavaScript and TypeScript, with strong emphasis on clean architecture, clean code principles, and software engineering best practices. From developing modern interfaces with React to designing robust backend services with Node.js and NestJS, I work across the full development lifecycle, prioritizing code quality, modularity, performance, and long-term maintainability.

Artificial Intelligence & Automation Experienced in integrating Large Language Models (LLMs), AI APIs, conversational systems, workflow automation, and intelligent assistants into real-world applications. Focused on building scalable AI-driven platforms using modern architectures, prompt engineering, context management, vector search, and real-time integrations.

FiveM Development Experience: Experienced in developing custom scripts and systems for FiveM servers, focusing on performance, scalability, and maintainable code architecture. Worked on gameplay systems, server-side logic, real-time event handling, UI integrations, database communication, and optimization of multiplayer experiences using JavaScript/TypeScript and modern development practices.

Professional Experience

Software Engineer

Jun 2022 - Present

Tarion-Beck IA

- Worked on full stack development of modern web applications, including UI/UX prototyping in Figma, frontend development with React and Next.js, backend APIs using Node.js and NestJS, AI assistant and chatbot integrations with OpenAI APIs, and automated testing implementation across projects.

FullStack Developer

Sep 2018 - Dec 2022

Connect Sports

- Worked on frontend development using React and video streaming libraries, building scalable media platforms. Developed APIs integrated with Microsoft Azure services such as Storage, Media Services, and SendGrid, while also implementing third-party payment gateway integrations and streaming-related features.

Skills

Main Stack:

• React • Node • Typescript • NestJs • NextJs • Clean Code • Figma • Agile Methods • Clean Architecture • TailwindCss • AI Specialist • Github Copilot • VScode • GitLab • GitHub • DevOps • CI/CD • N8N • ETL • Financial Institution

Cloud Experience:

• Azure (Storage, Media Services, Encoder, SendGrid, CosmosDB)
• Google Cloud Platform (SQL, Cloud Run)
• Amazon AWS (SES, CloudFront, Lambda, CloudWatch, S3)
